

A Special Friend

Have you ever met my intelligent friend? I guess you will all be surprised when you meet Richard at first sight! Richard is very smart and has skipped a year at school.

Now I'll introduce Richard to you. He is 10 years old but he studies in F.1. He has narrow eyes, an aquiline nose and a small mouth. He is about 145cm tall and likes to comb his hair using combs of different sizes and shapes.

Richard is a helpful boy, When I have any problems and questions, he immediately helps me and patiently solves the problems for me. He always helps his teachers and collects books for them. He cleans the blackboard neatly and tidily. Besides being helpful, he is clever too. Although he is 1 year younger than me, his grades are better than mine. He could speak when he was a month old and could read a lot of books when he was three. He is perseverant and never gives up.

Playing sports is one of Richard's favourite hobbies. He can play many different types of sports – basketball, baseball, football and so on. Apart from playing sports, he loves playing the harp. He reached grade seven of harp exam last month. He has also joined lots of harp competitions and won several trophies. He finds playing the harp relaxing and enjoyable.

Although we have just known each other for a year, it seems that we have had lots of marvellous memories. I hope we can keep our close friendship forever.
