This film, directed by Steven Spielberg is an adventure film published in 2016. As one of the Disney movies, the BFG consists of a lot of comedic scenes that will make you laugh non-stop! From the hilarious accent of the giant to the way the character "fart" together by drinking a green soda liquid. Thus, the camera angles and perspectives of this film are absolutely stunning. In the beginning, when Sophie gets kidnapped, the way the camera follows Sophie's movement, and we are just like flying with her. Both of us, the audience and Sophie, get dizzy together and the experience is amazingly impressive. Also, the interactions between BFG and Sophie are super cute, just like father and daughter. Their chemical reactions are amazing, which are enjoyable to watch.

Everyone who loves character development films should watch this film. I am super sure that you will need a pack of tissues by your side when you watch till the ending!
