

Film Review – An adventure to giant country.

The movie with the same name is adapted from the book written by Roald Dahl, and the story was remarkable and moving. I would give the film a four out of five stars because the scenes in Giant Country are realistic, and the remarkable work of the CG director is commendable.

The story tells the tale of an orphan named Sophie, who accidentally meets a giant, the BFG, when she looks out of the window of her orphanage. The BFG takes her to a mysterious place called Giant Country, where human-eating giants live. The BFG is bullied by the other giants since he is a vegetarian. The courageous Sophie decides to save the BFG from suffering every day, and they embark on a marvelous adventure to ask for help from a special person played by Penelope Wilton.

In my opinion, this fantasy movie has a well-packed plot and a thought-provoking story. It proves that nothing is impossible as long as you dare to try. Apart from this, I love the jokes, and I laughed out loud while watching this captivating film. All the characters acted well and hilariously, but overall, my favourite character is the BFG. I love his charming acting and how he talks in a funny way, which really make the movie fun and realistic. His interaction with Sophie is touching and amusing, especially when they share secrets with each other.

I think the teaching of the story is not to dislike someone or exclude them just because they are different from us. We should accept people of different races and stop racism, just like how the humans have accepted the BFG to stay in their country. It is an adventurous film for anyone who likes comedy and fantasy stories. It is touching and funny at the same time, and I could not take my eyes off the screen. There is no dead air throughout the film. I highly recommend this to all of you. Go and watch it soon.
