

### Fiona: the humorous bird

Have you ever met the special classmates in your class? Fiona is someone you would immediately fall in love with. Who is she? She's my new special friend in class 1C.

Now I'll tell you something about Fiona who has big eyes and wears a pair of glasses. She's about 160cm tall and she always wears uniform when I see her. So, I think she looks very clean and tidy.

Fiona is such a humorous girl! She would joke with everyone from time to time. She always makes us feel very pleased. She also observes the feelings of people around her. If she sees someone who is sad, she will use the soothing words to comfort you. Not only is her achievement really outstanding, but she was also the first in class before and usually gets praise from her teachers, but she never gets too proud. Therefore, everyone likes to get along with her and the places will always be much fun if she is there.

Drawing is one of Fiona's favourite hobbies. It can also express her feelings very well. During the painting process, she will concentrate on the painting, and enjoy the painting process very much. Also, she is interested in reading novels and always reads it because when she reads the novel, she understands the story as an onlooker, experiencing the life of the character and feeling the same emotions.

Fiona's character is worth learning for us. I hope we can stay good friends forever.
