

Imagine you were a bird with magical powers living in CNEC Christian College. You witness how students waste energy and resources on campus every day. Describe what you see, your feelings and actions.

### The Magical Sparrow

I am a sparrow with magical power. I've already lived in CNEC Christian College for ten years. I discovered the students of this school always waste a lot of resources.

Today I want to have the annual check for them. Since I don't want to scare them, I decided to turn into some water vapor. When I went into the classroom of class 1E during recess time, I saw there were a lot of students eating and drinking everywhere, even throwing away things that can be recycled, such as plastic bottles and aluminium cans!

Suddenly, I heard a noise like throwing things. At the same time, I also smell something delicious. I followed the smell and I arrived at the covered playground. I saw a student throwing a lunch box but inside it still had some food, so I turned back a bird and shouted, 'Don't do that! Stop!' However, he was scared that a bird could talk and the lunchbox inside his hand slipped into the trash bin. I used my magic power to find why he did that, and I discovered the reason he does not have much time to have lunch is because he needs to have extra-curricular activities after a few minutes. 'However he shouldn't throw away food even though he is very busy,' I thought. When I saw another student also going to throw away the lunch box, I used my magical power to let the lunchbox go to my 'hand' to have a taste – very delicious! However I only wanted to have a taste, I also didn't have any patience to check out another place of this school. I'm very disappointed with the students. I decided to write a letter to tell the principal:

Dear Principle of CNEC Christian college,

I see students of your school waste a lot of resources. This problem is very serious. I think these points are good :

- Add more recycle bins, because I can't see any in your school
- Have some lessons or interactive program to teach them 5Rs

Sparrow

After a few days, I saw the principle replied me with this letter :

Dear Sparrow,

These ideas are brilliant! Thank you for your suggestion!

The principal of CNEC Christian college

I hope I won't see the students are very wasteful at my next annual check or I'll be angry with them.

—THE END—
