

Magic Robot (inspired by Golden Goose)

In 2026, robots are very popular around the world and Desmond was a robot shop owner. He had a magical robot which produces an iPhone every single day.

'If I sell the iPhones, I will earn a lot of money. I'm going to be super rich!' said Desmond. He was very excited and went to the casino every day. He wanted to be very wealthy very quickly.

But he lost a lot of money every day and soon the money from the iPhone sales cannot cover the lost. 'If the robot keeps producing the iPhone, I think I will be the richest man in Hong Kong after many many years,' said Desmond. 'But if I dismantle the robot, I shall be able to have all the iPhones inside it at once!'

Desmond thought. 'I'm going to dismantle the robot now so I shall be the richest man without having to wait.'

So, Desmond took a screw driver and dismantled the robot. But when he looked inside, he could only find some wires in it.

'Oh my god!' he cried. 'I have ruined my robot that would have made me rich! Why did not I wait patiently?' He felt regretful and continued to vent his anger and sadness at the casino.

At the end, he went bankrupt and his robot shop was shut down by the bank.

Without any money to buy new parts, it was too late for Desmond to fix the robot by now!
