### **Book recommendation book: The Mix-up**

Have you ever gotten your bag mixed up with someone else? The book "The Mix-up" written by H. Q. Mitchell is a book where you'll see a group of teenage musicians who got their bag mixed up with someone. This is an exciting story about their journey to a music award. If you like solving problems, you'll like this book because you'll see the teens trying to solve the mystery of who has taken their bag.

The story takes place from their garage way up to New York. The plot is quite interesting. It is about Ronnie, who left her bag at the airport cafeteria where two robbers had also left their bag. The robbers came back first and took one of the bags. Then Ronnie took the other which later turned out to be the wrong one. The band has missed their fight just because of this incident and had to take the train instead. The robbers followed them onto the train. On the train, the robber scared them with a note saying the bag was dangerous. There are some interesting events that happened on the train where I'll let you find out by yourself. I'll only tell you this book has a happy ending.

I like this book because they kept calm even after reading the note that the robber gave them. What I think is quite interesting is that the writer shaped the two robbers in complete opposite personalities.

I would recommend this book to anyone who has an interest in problem solving.
