Are fashionable clothes important to teenagers?

Do you think fashionable clothes are important to teenagers? Nowadays, teenagers pay attention to appearance. They are very concerned about their own image. There are a lot of people wearing fashionable clothes in the street. It means that they are very important to teenagers. Here are the reasons why fashionable clothes matter much to teenagers.

The first reason is that fashion is a kind of social statement. Fashion is one of the ways that teens express and tell the world about themselves. It represents themselves.

The second argument is that fashion also shows a sense of identity. It can represent a group of teenagers. Their style might define the group of friends they spend time with.

My final point is fashion stands for popular culture. Most teenagers have their own favourite Korean pop idols. They will try to wear similar fashionable clothes which their idols wear. Teenagers find fashionable clothes important because they think it is a way to follow the lifestyle of their favourite stars.

These are the reasons why I think fashionable clothes are really important to teenagers.
